Export to iPhoto...  
Export to iWeb...  
Export to QuickTime...

- \* Images and iPhoto options create one image for each page.
- \* You can also simply copy and paste individual items into other applications.

## Support

Comic Life is published by Plasq. Be sure to use the link for Educators for educational pricing. They also have a more advanced Comic Life: "Magiq" for Mac 10.5 users.

[www.plasq.com/comiclife](http://www.plasq.com/comiclife)

FTC Publishing has a book, "Comic Life for Educators" that includes a template CD.

## Page Layouts

- \* Use the File to Page Format menu first to set up your project.
- \* Choose an orientation.
- \* Drag over a layout to your page or create your own.

## Images

- \* Drag your image into one of the panels. Double click it to move the image around.
- \* Use purple arrow to rotate. Use green boxes to resize photo or panel.
- \* Use clip art, photos, built-in cameras, pdf files, or scanned images.
- \* On a Mac, use "Quick Comic" in the File menu to process all images in an album.
- \* Hold down the option key to add a second image to a panel.

## Text and Balloons

- \* Drag blue dots to position the tail.
- \* Click the orange plus sign to add additional tails.
- \* Use the "Extend" bubble to add a "second paragraph" to a bubble.
- \* Bubbles will resize with text but check long words.
